

1. Executive Overview & Access Portals

Work Allocator is an enterprise task allocation, attendance management, and pro-rata salary slip generation portal built for Building India Digital. The platform operates on two distinct, independent portals:

- **Allocator Admin Console (URL: <https://workallocator.buildingindiadigital.com/>)**

Dedicated to Allocators & Management for creating employees, allocating tasks, tracking daily attendance timesheets, approving leaves, managing salary slips, and handling broadcast announcements.

- **Employee Portal (URL: <https://workallocator.buildingindiadigital.com/employee>)**

Dedicated portal for employees to view assigned tasks in tabular format, log daily clock-in/out attendance, submit work done details & hurdles, apply for leaves, receive task notifications via Bell icon, and request password resets.

2. Core UI & UX Design Features

- ' **Pure White 3-Second Splash Screen:** Displays a crisp white (#ffffff) initial loading screen with company logo branding and a 3-second (0% to 100%) gradient buffer progress bar upon application launch.

- ' **Hover-Expand Collapsible Sidebar:** In the Allocator Admin Console, the navigation sidebar remains in a compact icon-only state (80px width) and automatically expands smoothly on hover (256px width) with an optional Pin/Lock button.

- ' **Pure Tailwind Device Responsiveness:** Fully optimized across all screen resolutions including Mobile, iPad Mini, iPad Air, iPad Pro, MacBooks, and large desktop monitors.

- ' **Global Toaster System:** Replaced popups with real-time glassmorphic animated toast notifications for instant status feedback across all user actions.

3. Allocator Admin Console Features

- **Employee & Client Management**

Create and edit staff profiles with Employee Codes (e.g., BID-101), confidential Base Salary (visible to Allocator only), login credentials assignment, and color themes. Responsive cards feature action buttons for Edit, Credentials, Delete, and Resume Request.

- **Work Allocation Engine**

Allocate single or batch work items specifying Client Name, Post Type (Reel, Story, Post, PDF, Printable, Logo/Vector), Drive link, MP3/MP4 media links, and custom Allocator remarks.

- **Pro-Rata Salary Slip Engine & PDF Export**

Calculates pro-rata monthly salaries based on logged attendance work hours vs expected monthly hours (e.g., 200h). Supports custom allowances, deductions, remarks, and generates full-page A4 PDF payslips with enlarged company logo and zero top margin.

- **Salary Slip Edit Feature**

Allocators can edit generated salary slips directly in Firestore, modifying base salary, expected hours, actual hours, allowances, deductions, and notes with real-time total recalculations.

- **Attendance Timesheets & Leave Approvals**

Monitor daily employee clock-in/out timestamps, review submitted leave applications, provide feedback remarks, approve/disapprove leaves, and view uploaded proof documents.

- **Employee Password Reset Request Notification Panel**

Displays live notification cards when an employee requests a password reset from the login screen. Includes a 1-click password generator and share modal.

4. Employee Portal Features & Workflow

- **Tabular Task View with Delete Option**

Displays assigned tasks in a structured tabular format with columns for Date, Client, Type, Links, Remark, Work Report, Status & Review, and Trash2 Delete option for clean task management.

- **Live Bell Assignment Notifications**

Header Bell Icon features a live unread count badge (Ø=Ý4 2) whenever new tasks are assigned. Opens a notification drawer with Mark as Read & Clear All options that permanently clear notifications.

- **Daily Attendance Clock-In / Clock-Out**

Employees log work sessions with 1-click Clock In / Clock Out. Work duration is calculated automatically in hours and minutes with real-time IST running clock.

- **Leave Application & Document Upload**

Submit Casual, Sick, or Paid leave requests with optional proof documents. View Allocator feedback and re-submit disapproved applications with updated documents.

- **Forgot Password Request**

If password is forgotten, employees can click "Forgot Password?" on the login page to send a live reset request directly to the Allocator Console.

5. Step-by-Step Quick Start Guide

Step 1: Allocator Setup

Allocator logs into <https://workallocator.buildingindiadigital.com/>, adds employees with custom Employee Codes (e.g. BID-101) & Base Salary, and assigns login credentials.

Step 2: Task Allocation

Allocator navigates to Work Allocation tab, selects client name, post type, attaches Drive/MP3/MP4 links, and assigns tasks to employees.

Step 3: Employee Work & Clock-In

Employee accesses <https://workallocator.buildingindiadigital.com/employee>, clocks in for the day, views assigned tasks in Tabular View, updates task status, and submits work done & hurdles details.

Step 4: Salary Slip Generation

At month-end, Allocator opens Salary Slips & Payroll tab, selects employee and month, automatically calculates pro-rata work salary based on attendance, edits deductions if needed, and downloads/prints full-page A4 PDF payslip.
